FINAL ASSIGNMENT
CREATIVE CODING
SM2715

KWAN KIN MAN

57316773

Introduction

It is an interactive game using camera and 3d library, about colliding certain target and avoiding approaching bomb to attain goal. In this game , player can control their UFO to touch the red cube to gain score and even win, during the process they have to avoid touching the bomb, otherwise they will lead to game over. By clicking R button to restart the game , users only need to move their body to control the UFO instead of

clicking buttons.

The original code was broken , so that the current code even bomb touched wont shows game over screen.
